Every place. One coordinate.

A searchable directory of all 1,226 cataloged points and places of interest, including the named PassageWay underground system. Copy-ready commands are reference coordinates—not a promise that the destination is a safe arrival block.

1,226 records | 9 projects | 213 authored/exact references | 1013 derived centers | snapshot c39d0d67c9dec737…

Coordinate truth boundary

Copy-ready /tp commands use catalog entrances or exact points where available, path starts for routes, and clearly labeled derived centers for area geometry. They are references, not safety-validated arrivals. When the catalog has no narrow usable Y value, the command uses ~ to retain the operator current elevation instead of inventing one. No world edits were made.
