The Empty Eight public-retail round

R08AL + R08AM accepted · post-verified · reversible

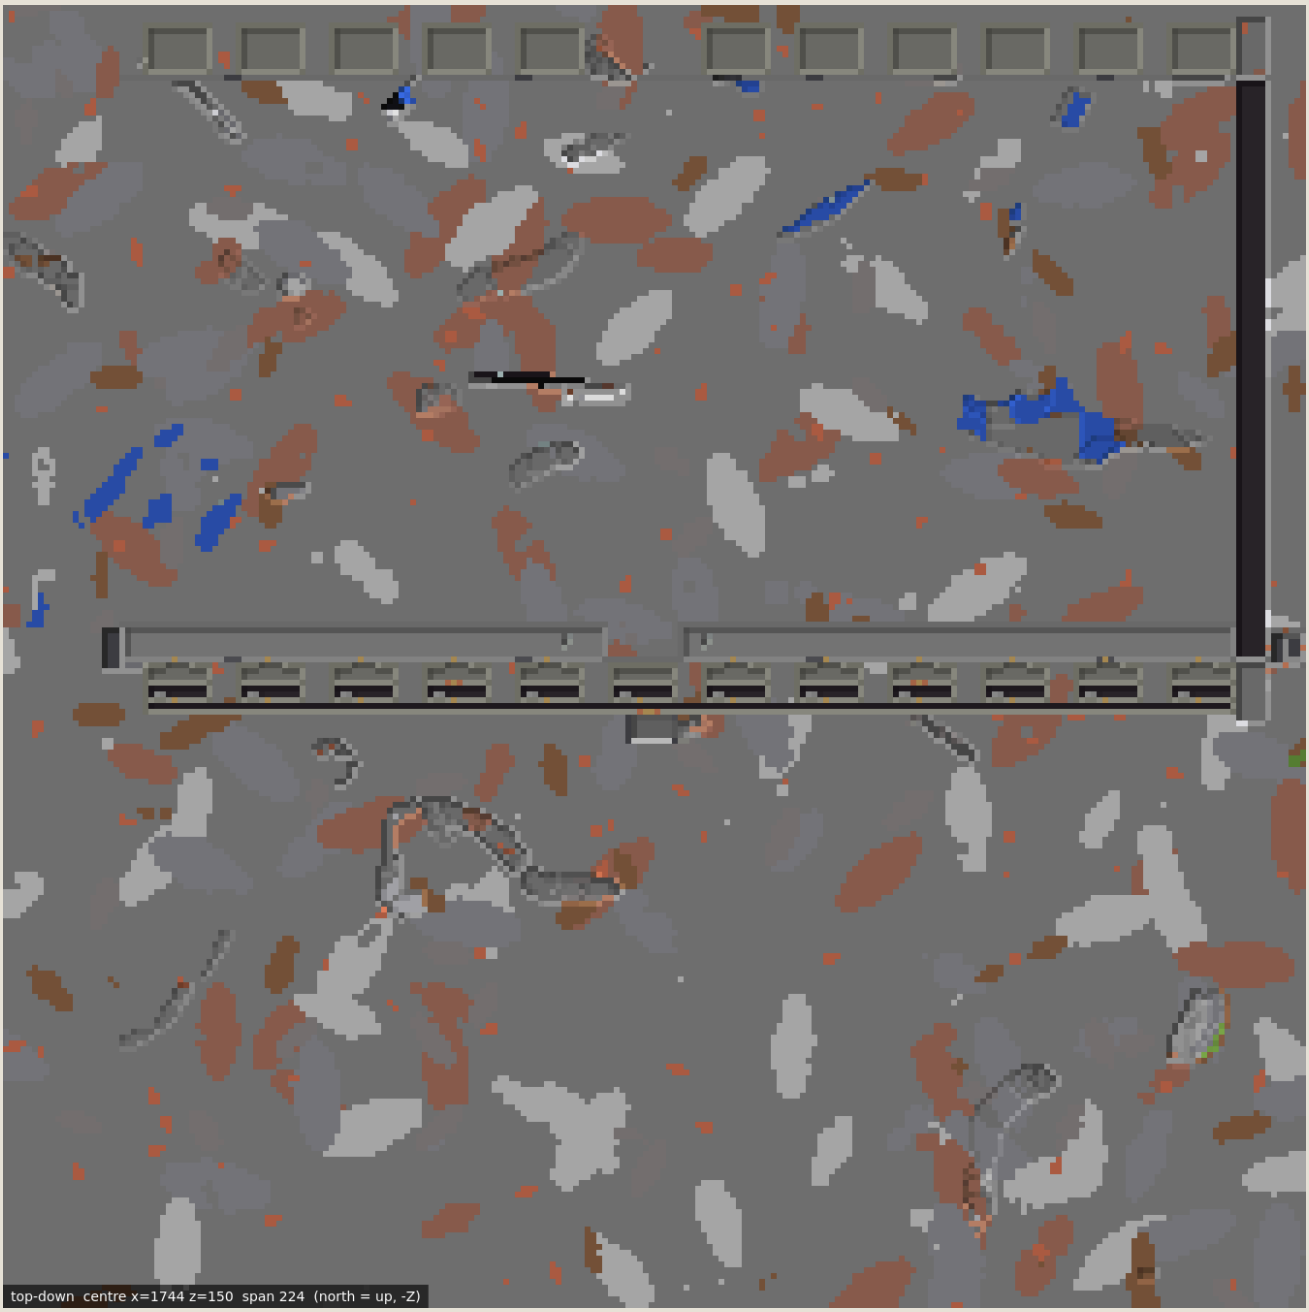

A clean, lit, dystopian vacant-retail gallery is now open for bounded public exploration. Its maintained back-of-house and the deeper theatre/private-club annex remain secured, restricted, and non-public.

Public gallery

R08AL opens exact bays `EE-R-S01…S05` and `EE-R-S07…S12`. Each is vacant, clean, lit, and publicly viewable through a 4×2 opening. Eleven manual smoke doors retain the bounded interior separation. No tenant, commerce, occupant, NPC, or entity has been installed.

`EE-R-S06` and the complete north row remain capped. The two public stairs are bounded internal exploration routes from PF08, not a claim of surface egress or accessibility.

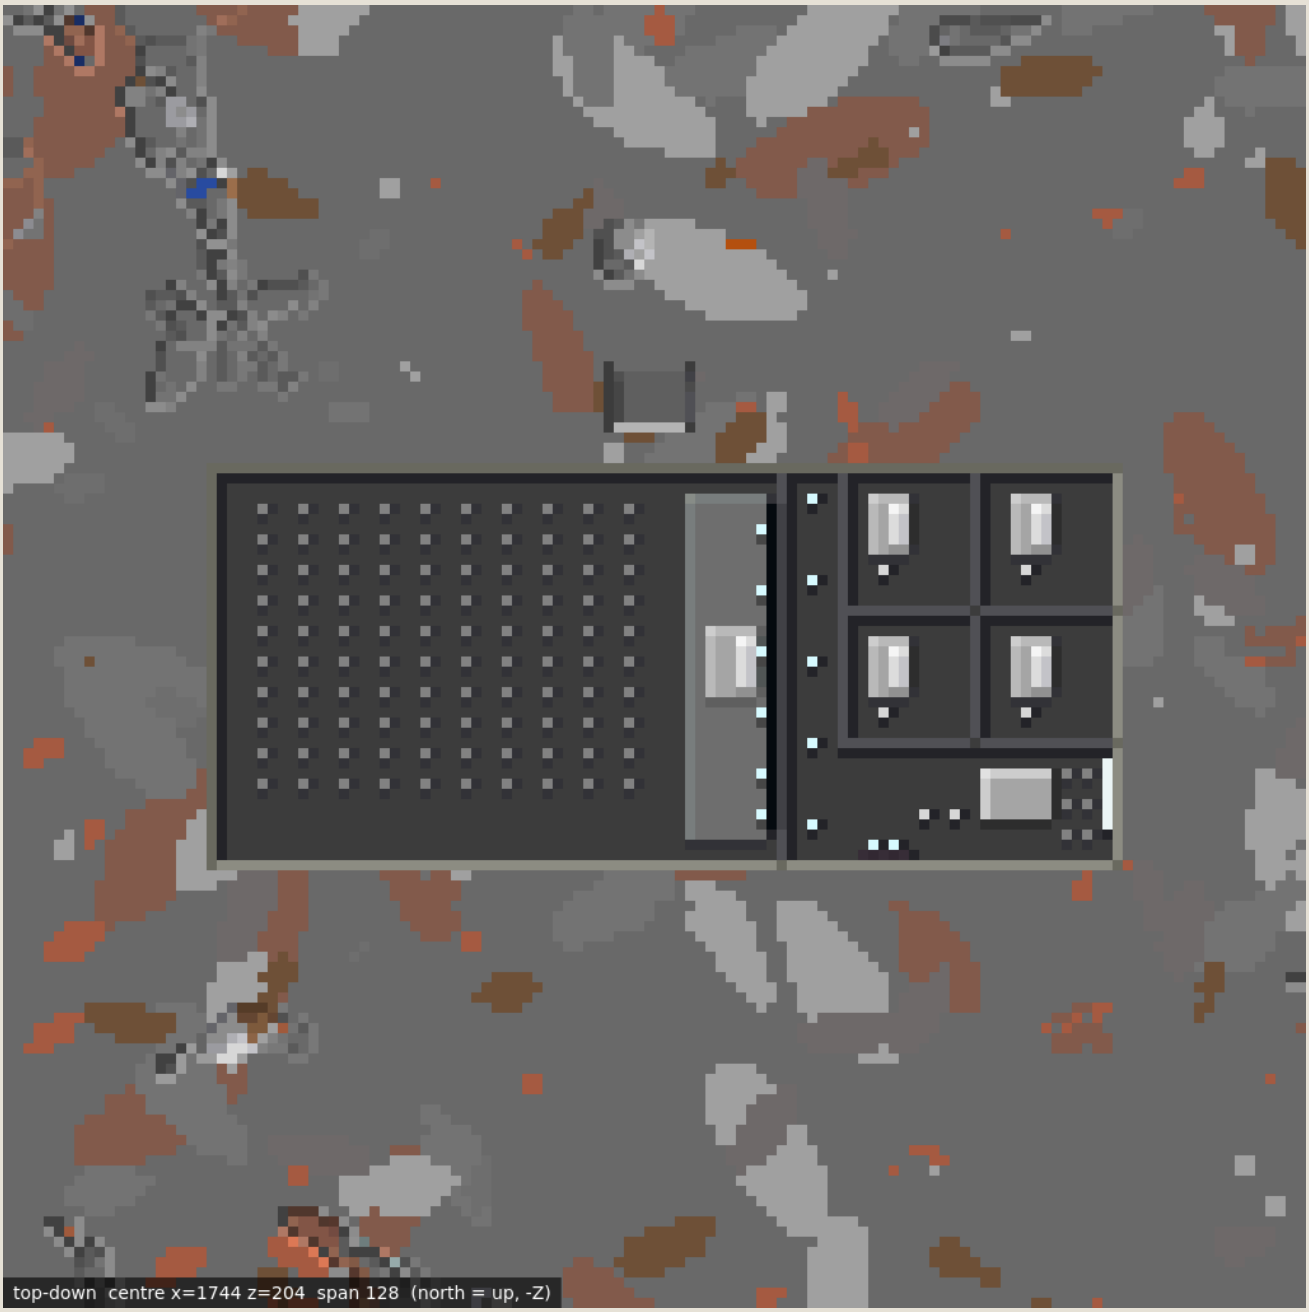

Snapshot-derived upper sectional map, Y=40…51, rendered from the accepted R08AM post. The public claim applies only to the eleven south gallery bays; the rear BOH remains restricted.

Maintained restricted back-of-house

The completed BOH has twelve maintained rooms and a continuous 372-cell service spine. Only two marked staff/service doors lead from public gallery space. Twelve secured internal room doors keep the service area non-public; twelve warm lights and 24 booth seats support the static fit-out. No entities were introduced.

Restricted lower annex

> R08AM adds a secured seven-wide grand stair descending 25 blocks from the BOH. The lower annex contains a 100-seat theatre and a separate private-club wing. The wing has four consensual adults-only restricted suites, a communal lounge, two simulated fireplaces, two non-explicit swing seats, billiards, and a six-seat cinema.
>
> The presentation is non-explicit. There is no active fire, no occupant or NPC, and no depiction of anatomy, sex acts, coercion, confinement, or violence. The annex is not public.

Retained closed interfaces

- `S06`, every north bay, and the N06 source-physics exception remain capped or untouched.
- Future rail stubs remain closed; no public, passenger, or full-guideway transport is claimed.
- Drainage, fire/service, ventilation, utility, and mechanism interfaces remain closed.
- No exterior discharge, surface egress, or accessibility claim is created.

Generated 2026-08-22 UTC from accepted immutable execution and independent post-release QA evidence. Historical capped-shell evidence remains provenance; R08AL supersedes it only for the eleven exact south public bay faces, and R08AM owns only its exact restricted seam and annex.
